Hopeful kids are happy kids by Dr Justin Coulson

Think of two children who you have regular contact with: one who is resilient and happy, and one who is struggling and languishing. Imagine you are interviewing each of them and you ask them to rate their response to these six questionnaire items:

- ✚ I think I am doing pretty well
- ✚ I can think of many ways to get the things in life that are important to me
- ✚ I am doing just as well as other kids my age
- ✚ When I have a problem I can come up with lots of ways to solve it
- ✚ I think the things I have done in the past will help me in the future
- ✚ Even when others want to quit, I can find ways to solve the problem.

Chances are that the child who is resilient will respond affirmatively to these items. The child who is struggling is more likely to say 'no' than 'yes'.

These items form the basis of the internationally-recognised Children's Hope Scale that is used to assess the hopefulness of children and teens. Hope is a critically important predictor of their wellbeing and resilience.

Hope or Optimism - Hope sounds a bit like optimism. We hope good things will happen ... so we're optimistic. But there's more to it than that.

While optimism is the belief that good things will happen in the future, and the sense that the glass is half full, hope is about taking that optimism, making it goal oriented and putting legs on it to make things happen.

And while optimism is great for boosting wellbeing and can act as a useful tool for inoculating people against depression, it seems hope does it better.

**Last day of term this Friday
2.30 dismissal
First day term 3 - Monday 23rd July**

To receive the newsletter via email, subscribe to the Glenelg Primary School list, by sending a new email to: listserv@lists.schools.sa.edu.au with a message body of: **Subscribe GlenelgPS** (Leave the subject line blank).

This may be because while optimism is a positive mindset, hope is about action.

In contrast, if you don't have hope, you're, well, hope-less. That's related to all the things we don't want for our children. Hopeless kids don't try, have poor relationships and feel helpless. They don't achieve goals, often because they don't set any. And when they do set them, that's where it stops because they don't have enough hope to find ways to achieve those goals.

Encouraging kids to be hopeful

Talk to children about their possible futures. What do they want to achieve, and why? Have them imagine their potential best selves. Talk to them about what they're looking forward to. Ask them what they want to have, do and be.

Work with them on plans (or pathways)

When your child or young person says "I want to be a marine biologist", be encouraging and then ask them, "What do you need to do to get there?" Discuss pathways, options and possibilities. Thinking about the future and making plans is central to fostering hope.

Help them solve problems

When your child or young person is stuck, instead of giving them an answer, ask them, "What do you think is the next best thing to do?" or "When have you overcome something like this before?" This type of question promotes a sense of agency or efficacy. Rather than having our children rely on us for all the answers, they can rely on themselves, their resourcefulness and their initiative. They can recall times they've succeeded before and use that to build hope that they can succeed again.

As parents, our wish for our children is that they will grow up happy and resilient. Our wish can become 'hope' when we use these three keys to build hope in them as they look towards the future.

Dance performance

The year 4-7 students have been participating in Dance with Donna throughout this term. They have learnt some fantastic moves and we ask parents to join us for a performance under the COLA on the last day of term, **Friday July 6th at 9.00am**. We hope that you will be able to join us to see some of the learning. Chairs will be provided but it will be cold (and perhaps raining?) so bring your coats/jackets.

Contact Us: 8295 3943 **eMail:** dl.1017.info@schools.sa.edu.au www.glenelgps.sa.edu.au **Principal:** Rae Taggart
Deputy Principal: Anthony Fischer **Assistant Principals:** Paul Lendrum Bobbie Beswick Malcolm McArdle

From the students about dance

Since week 2, the students have been working on a dance that is taught to them by Donna, who runs her own dance company. She comes to the school to teach the classes a dance routine to perform. Each year level has a routine based on a popular style of dance from each decade. The students work on their routines for 1 hour each week in the hall, as well as a dance the whole school will be performing together. Donna has also been teaching the students dances such as the jive, the waltz, and the military two-step. On Friday morning at 9am (week 10) there will be a performance where parents and family can come to watch the students perform the dances that they have been working on. This will be held under the COLA.

School Reporter

Connectivity in Schools

Our school has been actively working with the Department for Education's IT team to improve our internet connectivity. As such, we've been fortunate enough to be one of only 6 schools chosen to participate in a pilot program.

This is an exciting initiative aimed at delivering faster, more reliable internet services to every student, in every school across the state – and, we are thrilled to be part of it.

The internet connectivity pilot will be rolled out in our school during the July school holidays to minimise any disruption and will run throughout the second half of the year.

Great change sometimes comes with teething problems so there may be some disruption to regular IT services while we work on improving the internet at our school. The good news is, our school will be getting extra IT support during this time to minimise any disruption.

As a parent, you don't need to do anything. We just wanted to share this exciting news with you about the great improvements we're working on for our school.

Kids' Council Report

At the meeting this week there were only a few things to discuss. Firstly we reminded everyone about the Casual Day on Wednesday that is raising money for the Cancer Council. We all know people that have been touched by Cancer and we would like to help with research for a cure.

Ms. B then talked to us about Fun Lunch. She is looking for students to run activities at lunch time for any of us to join. There have been some great Fun Lunch activities of dance, basketball, making, table tennis, knitting and so many more. Please sign up on the sheet near Ms. B's office.

The last thing we discussed was the money for a Kenyan school. Mr. Rose has \$900 that was raised and we decided that Kids' Council would add another \$100 to make it up to \$1,000. Thanks everyone.

Chess Tournaments

We recently conducted our Term 2 chess tournaments. With ever increasing interest in chess at Glenelg, we had many students wanting to play. 84 students participated on Day 1 and 70 on Day 3. This is capacity for us, so we had many disappointed people on a wait list.

The standard of play is going right up as many of our students are playing family members and also practising online. While many of our players have years of experience in chess tournaments, we welcomed quite a few new players too. One of our youngest players was Emma, a Year 2 student. She had a great start scoring 4 points and showed excellent potential.

We did a survey recently and discovered that many of our Junior Primary students can already play chess. It appears that older siblings are introducing them to the game and then some of these children teach their mates at school. This means we should have a never ending supply of chess players at Glenelg. Parents regularly express surprise at the high interest in chess when the media portray today's children as only being interested in activities done with a device. Our chess program is proving this to be wrong.

We are also pleased that our move to female and male divisions has seen ever increasing numbers of girls entering our tournaments. Our figures were 42% female and 58% male and a female was the gold medal winner in OPEN division.

RESULTS

The OPEN division is for the top female and male players. The gold medal went to Evelyn, silver to Ryan and bronze to Julian on a count back. Fair play award went to Alex. He loves chess and always looks out for others.

Queens' gold was won by Emilia. Emilia is relatively new to chess and she has rocketed up through the ranks. Silver went to Issy and bronze to Sofia. Lily-Rose and Tillie both scored 5 and were unlucky to not gain a medal. Fair player was awarded to Grace. Grace has a positive effect on those around her and encourages them to do their best.

Rooks' gold was won by Milly with a perfect 7 out of 7. Lily took home the silver and Vinayika the bronze. Jess was awarded the fair player award. She is a regular at chess club and has done much to promote chess among the girls.

The Bishops' gold medal was won by Oliver. Ashton was a big improver and took the silver, while Hendrix won the bronze. There were 6 boys on equal 5 vying for the bronze so a bit of bad luck after such good play. Andrew was awarded the fair play award. His enthusiasm for chess and willingness to help out provides a good role model for his peers.

Andrew won the gold for Pawns. Elliot took the silver and Oscar was beaming when he was awarded the bronze. Deqi was a very popular winner of the fair play award. He is a very positive person and this rubs off on the other players.

A big thanks to the many people who help with our tournaments. Koebi, a former Glenelg student does a magnificent job setting up and adjudicating matches. Mrs Richardson has been helping with chess since her two children played many years ago. Mr McArdle organises all of the desks from the container, Mr Lendrum sorts out our IT and Colleen and Patrice manage the finances so we can pay for

Mato and the medals etc. We are lucky that Mrs Taggart fully supports chess and promotes the thinking and social skills it provides.

Chess Club will continue each Thursday recess time. We try to have it under the COLA but if the weather is against us, we move to Room 16 upstairs.

Peter Wright

May we also say, a huge thank you to Peter Wright who continually gives up his personal time to promote and organise this fantastic event which enhances the thinking skills of children. Rae

Africa Day

On Friday of week 8 we came along wearing something African to support a school in Kenya that Mr. Rose is visiting in the school holidays.

We raised nearly \$900 and the Kids' Council have agreed to make that up to \$1,000 to give to the school. Mr. Rose is creating a sister school with the school and taking some information from our students to the school.

OSHC gate

Please note that the gate next to the OSHC building will be locked for after school departures starting next term. We have a large number of children in this area after school signing in for care and Happy Haven have asked if the gate can be locked to ensure the safety of children at this time.

Dog Food Experiment

This term in Science we have been learning about Fair Tests so Mr Wright organised a dog food experiment. We sent a note home to people who have dogs. We all went in to the Hall. There were seven different dogs. There were also four different types of dog food – 2 dry and 2 wet.

The owners let the dogs sniff the foods one by one and then the dogs walked back and could choose their favourite. When we got the results we found out that all of the dogs ate the wet food but they didn't like the dry. Only one dog didn't eat anything but a few dogs ate one but the next round didn't.

The dog food was the variable (change). A few other things may have been variables. For example they might have gone to the closest food or a known person. After we got the results, the other Year 5 classes explained what they had been doing to learn about fair tests.

Year 4 Zoo Snooze - room 14

On Monday 28th May we left to go to the Adelaide Zoo at 12:45 pm. We arrived there at 2:15pm and we got ready to do our fieldwork. After, we went to the Rainforest Aviary where we fed some birds. My class and I went there to learn about habitats, ecosystems, biomes, food webs, and even dung from the cassowary and the Daintree Rainforest. It was amazing! I liked it so much and it was fun. We slept overnight. However, before we went to sleep we saw Zootopia, the movie, and after that, we went to bed.

The next day when we woke up, we packed up. After, we had breakfast and then we went for a morning walk. The monkeys were making funny noises. Later we went to Nature's Playground. On the way, we went to see the Sumatran tiger. After we attended, the panda talk and we saw Funi and Wang Wang. Finally, we got on the bus and went back to school.

My favourite thing was Nature's Playground because there were many things to do. I would recommend going to the Zoo Snooze because it is an amazing experience and a once in a lifetime opportunity to sleep at the Zoo.

By Mia

After we got to the Zoo we went and put our bags in the lockers.

Next, we got into our groups and left to see the cassowary. After, we went to the bird aviary. Later we came back to the room to get ready to have dinner. After dinner, we got in bed to watch a movie. The movie was funny!

I had a great time because I had never slept at the zoo before. My favourite thing was seeing the animals at night because you would not normally see them then. I think students should go to a Zoo Snooze because it is an amazing opportunity and also, fun!

DID YOU KNOW?

RECYCLING AT GPS

Students recycle their 10c containers in the classroom using blue buckets and out in the yard using the yellow bins which we call 'skippies'. Monitors from Ms. Veroude and Ms. Booth's class kindly wheel the skippies out on trolleys in the morning and bring them back in after lunch. Every 2 weeks, these monitors plus more, help sort and bag the containers, taking out and throwing away the straws and lids. In summer, this can be a smelly job.

Ms. Willson takes the containers to the depot and collects the money. It usually takes 12 months to total \$1000 which we donate to the Cambodian Children's Fund. This excellent organisation is run by an Australian Scott Neeson. For the last 14 years he has helped thousands of children who were scavenging on rubbish dumps and not attending school (which costs money in Cambodia). Besides paying school fees, Scott has spent all of his money on setting up medical and child care centres, night English classes, a bakery, providing evening meals for little ones, and a home for 100 children who 'live in' because they have no home to go to.

Americans (including many film stars as Scott used to work for Sony and 20th Century Fox) donate a lot of money as well as many Australians like us.

BREAKING NEWS:

Well done Ms Willson and all the monitors on reaching your \$1000 goal. A huge success and a great achievement for the planet and the children you are helping.

So far we have sent \$5000 to CCF. We have raised \$975 since last May so are \$25 away from sending off our next cheque.
